

## KEY INFORMATION DOCUMENT

### Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

### Product

**PRIP Name:** Foreign Exchange (FX) Non Deliverable Forward (NDF)

**PRIP Manufacturer:** Lloyds Bank plc. ("Lloyds Bank")

Call 0203 578 0064 for more information

**Website:** <http://www.lloydsbankcommercial.com>

**Competent Authority:** Lloyds Bank is regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

**Date of Production:** 19/07/2019

**You are about to purchase a product that is not simple and may be difficult to understand**

### What is this product?

**Type:** An Over the Counter (OTC) contract - Foreign Exchange Instrument

**Objective:**

The objective of the FX NDF is to manage adverse movements in currency rates that you may experience. Note that it may not provide you with complete protection against such exposures. The product is specific for currencies, (Reference Currency) where delivery restrictions prevent the physical exchange into another currency (Settlement Currency).

The product achieves its objectives by Lloyds Bank agreeing the terms of an OTC contract with you under which you will agree a foreign currency exchange rate (Forward Rate) on a fixed future date (Settlement Date) and a Reference Currency Amount. The Forward Rate will be dependent upon your choice of Currency Pair and Settlement Date. It will be calculated from a foreign currency exchange rate (FX Spot Rate) and adjusted by the appropriate Forward Points (as defined below).

Two days prior to the Settlement Date the Forward Rate will be compared to the FX Spot Rate on the day and the net difference, times the Reference Currency Amount will be paid in the Settlement Currency. If the net difference is a positive number Lloyds Bank will make the payment to you and in the case of a negative number you will be required to make the payment to Lloyds Bank.

Sample Parameters are set out below for the sale of USD and purchase of INR:

Currency Pair	USD/INR	Reference Currency Amount	INR 709,490.0	Forward Points	2.1289
Reference Currency	INR	Settlement Date	12 months	Forward Rate	70.9489
Settlement Currency	USD	FX Spot Rate	68.82		

**Intended Retail Investor:**

This product is intended for retail investors with a short to medium time horizon who:

- (i) Have sufficient knowledge or experience with complex financial products; and
- (ii) Have exposure to the relevant foreign currency and want a level of protection against adverse movements in foreign currency exchange rates.

**Term:**

The term of the FX NDF will depend on how long you wish to protect against adverse movements in foreign currency exchange rates and will be agreed before you enter into the product. The product is a bilateral agreement that cannot ordinarily be terminated unilaterally by either you or Lloyds Bank. The product terms provide that if certain events of default or other termination events occur, Lloyds Bank or you may terminate the product early. In such an event, the early termination payments described below will apply and the return (if any) you receive on such termination is likely to be different from the scenarios described in this document.

### What are the risks and what could I get in return?

**Risk Indicator:**

The risk indicator assumes you keep the product until the agreed Settlement Date. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to end your product early. You may have to pay significant extra costs to end your product early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level. **Be aware of currency risk. Where you receive payments in a different currency the final return you get depends on the exchange rate between the two currencies. This risk is not reflected in the indicator shown above.** This product does not include any protection from future market performance so you could incur significant losses. If we are not able to pay you what is owed you could incur significant losses.

#### Performance Scenarios:

This table shows the money you could get back or pay over the next 12 months, under different scenarios, assuming a nominal value of USD 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be easily ended. This means it is difficult to estimate how much you would get if you end before the recommended holding period. You will either be unable to end early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Investment: USD 10,000		12 Months (Recommended holding period)
<b>Stress scenario</b>	<b>What you might get back or pay after costs</b>	-USD 2,390.82
	Average return/ loss over nominal amount each year	-23.91 %
<b>Unfavourable scenario</b>	<b>What you might get back or pay after costs</b>	-USD 648.36
	Average return/ loss over nominal amount each year	-6.48 %
<b>Moderate scenario</b>	<b>What you might get back or pay after costs</b>	USD 33.64
	Average return/ loss over nominal amount each year	0.34 %
<b>Favourable scenario</b>	<b>What you might get back or pay after costs</b>	USD 751.43
	Average return/ loss over nominal amount each year	7.51 %

Average return is calculated as the FX NDF's market value under each scenario divided by the notional amount.

#### What happens if Lloyds Bank plc. is unable to pay out?

You may be exposed to a risk that Lloyds Bank might be unable to fulfil its obligations in respect of the FX NDF. The product is not protected by any local investor compensation or guarantee scheme. This means that if Lloyds Bank is unable to pay out, you may not receive any amount from Lloyds Bank under the product.

#### What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the performance of the product. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, over the recommended holding period. They include potential early exit penalties. The figures assume a nominal value of USD 10,000. The figures are estimates and may change in the future.

##### Costs over time:

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment Scenarios [USD 10,000]	If you cash in at the end of the recommended holding period
<b>Total costs</b>	USD 125.93
<b>Impact on return (RIY) per year</b>	1.28 %

#### Composition of costs:

The table below shows:

- the impact each year of the different types of costs on the performance of the product at the end of the recommended

---

holding period;

- the meaning of the different cost categories.

The costs below are the maximum values shown and will vary depending on the underlying parameters of the transaction.

**This table shows the impact on return per year**

One-off costs	<b>Entry costs</b>	1.28 %	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.
	<b>Exit costs</b>	0.00 %	The impact of the costs of exiting your investment when it matures.
Ongoing costs	<b>Portfolio transaction costs</b>	0.00 %	The impact of the costs of us buying and selling underlying investments for the product.
	<b>Other ongoing costs</b>	0.00 %	The impact of the costs we take each year for managing your investments.

---

## How long should I hold it and can I take it out early?

**Recommended holding period:** This product is designed to be held to the agreed Settlement Date in order to match your investment requirement. It is a product designed to be entered into for its term and cannot be easily sold. Early termination may occur (i) if certain events of default or other termination events occur or (ii) at the sole discretion of Lloyds Bank in which case early termination payments may apply.

**Early exit impact:** If the product is terminated early, in whole or in part, an Early Termination Payment may become payable by either you or Lloyds Bank. The Early Termination Payment is linked to market parameters and could be a substantial loss or gain to you. Settlement on early termination will be specific to your FX NDF and will be influenced by a number of factors which include but are not limited to: whether it is an increasing or decreasing foreign exchange rate environment; the movement of the FX Spot Rate since the transaction Trade Date; the amount affected by the early termination.

**The Early Termination Payment is not a penalty charge.** The sum represents the economic value of what Lloyds Bank would have paid or received if the product continued as agreed. Depending on market conditions at the time of the early termination, the settlement calculated could result in a substantial amount being due from you to Lloyds Bank.
